TECHBERRY MANAGED SERVICES

Client Geography

CS 1: CREDIT RATING COMPANY

Company is India's only credit information bureau catering to all borrower segments – MSME and Commercial borrowers, Retail consumers, Microfinance borrowers. It is the pioneer in building and operating the country's first and world's largest Microfinance Bureau Database. Clients provides Analytics, Data Management and related Software solutions promoting a more mature credit culture in the Indian economic system and sustaining the financial needs of businesses and consumers.

Business Challenges

Client was looking for trusted partner to manage the core business application on Infrastructure area. Trusted Partner should handle the database, middleware with end to end ownership.

Service Rendered

- Upgradation of middleware platform in target time.
- 24*7 Onsite Database and Middleware support services for their critical business application
- Provided application monitoring support service

Techberry's Approach

- Techberry studied infrastructure required (database & middleware) by the client & provided cost effective service to the client.

Technology Supported

- Oracle database Exadata with RAC & ASM.
- Oracle weblogic server.
- Apache & Tomcat servers.
- AWS Administration

CS 2: ENVIRONMENT MANAGEMENT COMPANY

Clients is internationally recognized as a premier company in water and environment management. They are among the largest environment solutions providers, one of very few companies worldwide with a complete range of technologies, products and services. This enables them to offer total solutions for every sector of society

Business Challenges

Clients were looking for trustworthy partner who can reduce the IT operations Cost but not the services level. They were looking for technology partner who can support their business application infrastructure too.

Service Rendered

- Provided remote professional service & remote support service for their 8 locations with end to end ownership.
- Upgarding Middleware environment.

Techberry's Approach

- Techberry understood thorough requirement of the client which helped them optimize their technology cost.

Technology Supported

- Oracle Database
- Oracle Application Server
- Microsoft SQL
- Redhat Linux.

CS 3: DATA CENTER SERVICE COMPANY

Leading Data Centre companies having multiple Data Centers across India and abroad having state art of infrastructure wrapped around with managed services to fulfill client requirement of one stop shop for all services

Business Challenges

- To find suitable partner who can compliment their managed infrastructure service by providing data & middleware service.
- To create, recruit & retain talents who can comprehensively deliver with flexibility of new technology augmentation.

Service Rendered

- Automation of routine process
- Streamlining customer facing application middleware.
- Managed Service

Techberry's Approach

- Techberry's approach is to provide full stack service across database, Middleware technologies which shall benefit IDCs to further provide these services.

Technology Supported

- Oracle, Microsoft SQL, MySQL, PostgreSQL, NoSQL.
- Weblogic, Websphere, Tomcat
- Apache, IHS, IIS, IAS, NgNix.
- Oracle weblogic server
- Apache & Tomcat servers.

CS4: RETAIL CHAIN COMPANY

Leading Retail an Indian department store chain having 85 stores across 40 cities in India, with clothing, accessories, handbags, shoes, jewellery, fragrances, cosmetics, health and beauty products, home furnishing and decor products

Business Challenges

Client was looking for trusted partner to manage their core business application infrastructure. Trusted partner should handle all the database including datacenters.

Service Rendered

- Technology Professional Service
- Technology Managed Service
- 24*7 remote database support for critical business applications & stores.

Techberry's Approach

- Company studied the current issues and provided standard parameters and best practices to avoid routine issues and stable the customer facing applications.
- Studied required database infrastructure and provided cost effective services which reduced the operational Cost

Technology Supported

- Oracle database
- MS-SQL
- MySQL,
- PostgreSQL,
- Mongo DB.

CS5: LEADING CO-OP BANK

The client is one of Maharashtra's leading cooperative banks, serving a wide customer base with a range of retail and commercial banking services. The bank plays a vital role in providing financial inclusion through robust banking operations and services.

Business Challenges

The client was operating on an outdated Core Banking System (CBS) application and legacy databases that lacked scalability and were prone to security vulnerabilities. There was an urgent need to modernize the infrastructure to ensure high availability, improved performance, and better security compliance.

Service Rendered

- Upgraded databases and middleware
- Worked with application team in seamless CBS upgrade
- Implemented advanced security: TDE, AVDF, and data redaction
- Enhanced performance, scalability, and data protection

Techberry's Approach

- Seamlessly upgraded databases and middleware with enhanced security
- Collaborated with the application team for smooth implementation
- Leveraged Oracle ODA, RAC, Middleware, AVDF, TDE, and Data Redaction

Technology Supported

- Enhanced System Scalability – Ready for future transaction growth
- Improved Application Performance – Faster and more responsive CBS environment
- Strengthened IT Security – Reduced risks with robust data protection and monitoring mechanisms
